

New Book by Doctor Jac Tells Story of US Naval Intelligence Officer

***Undaunted Lovers* Details Experiences in Navy and Love**

SAN JOSE-September 15, 2016-Starting his third career as a novelist, Doctor Jac published his first book, *Rough Waters, The Life of a Naval Intelligence Officer* in July 2014. Doctor Jac turned to his experiences growing up and serving in the U.S. Navy as an intelligence officer to tell the story of a man's life, both personal and professional. *Rough Waters* is semi-biographical covering a number of Doctor Jac's experiences during his naval intelligence service in Asia Pacific.

At the urging from his fans, he launched the *Spies with Benefits* series.

Undaunted Lovers, the first book in the *Spies with Benefits* series and the new book by Doctor Jac, tells a tale of forbidden love between U.S. Naval Intelligence Officer Lt. Michael Holmes, and Liu Chan-Juan, the married daughter of Chiang Kai Shek's former Chief of Staff. This tale is a modern version of *Madame Butterfly*, which follows the couple as they struggle to maintain a forbidden relationship.

Doctor Jac has a B.A. from the University of Notre Dame in political science, M.A. from San Francisco State in organizational psychology and a Ph.D. from the University of Southern California in organizational communications.

Doctor Jac served as a naval intelligence officer in the 1950s before entering the business world in 1959. After a successful career as a human resources executive in 1978 he developed the first HR quantitative reporting system. This provided HR with a method for evaluating the effect of its services on the organization's goals.

In 1980, he founded the Saratoga Institute to carry on the development of the quantitative system. He has long been acknowledged as the father of human capital strategic measurement and analysis. To date, he has trained nearly 100,000 managers in 46 countries on return on investment and predictive analytics.

In 2000, he sold the Saratoga Institute, which is now the Saratoga Division of PricewaterhouseCoopers. In 2004, he left Saratoga and started a personal consulting and training service under the name of Human Capital Source, which he continues to date.

Over his lengthy career, Doctor Jac has received many awards, as well as being profiled on the cover of several human resources magazines and winning the Book of the Year Award twice, for his books, *Human Value Management* (1991) and *The ROI of Human Capital* (2001).

Undaunted Lovers will be available in paperback September 1st on Amazon.com.
